

Wild Day on Wall Street, Bears Having Their Own Way Early, But Routed Later

NEW YORK STOCKS SLUMP BADLY ON FOREIGN LIQUIDATION, WITH LATER RALLY.

NEW YORK, Oct. 9.—Foreign news of a warlike character, a raft of it, was responsible for a flat opening at 1 to 3 points decline on leading securities, with considerable excitement on Wall Street, and quite lively trading.

London was a very heavy seller, and other European cities were inclined to dispose of Americans. The London selling was considered by some observers of the situation to represent unloading on this side of the pond, and the Rock Island people were accused of cabling the orders in large volume.

This had the effect of augmenting the big market manipulators on this side, and they refused to step into the breach and take stock, the Rock Island action being considered a blow at the harmony plan that has kept the interests in an alliance for the support and strengthening of the market during the political campaign, and for the aftermath, should there be one.

May Be Mistaken

There are evidences that this view of the foreign selling is not well founded. The fact that Sterling is strong, when it is usually weak at this season of the year, would seem to indicate that the selling is actually foreign holdings, the liquidation accounting for the strength in exchange. If the selling was actually by Rock Island interests it would have no effect on exchange. Arbitrage brokers say that London sold 100,000 shares in the first hour. There are those who insist that the Continent has been selling through London.

Whether the solution is right or wrong, it is a fact that the big interests led by E. H. Harriman were not giving the market an ounce of support. They know exactly the position of the market, they know how near London is bare of American securities at this time, and they are not willing to accumulate any more securities just at present, having given up the chance for the illusive eight and quarters of speculation and biding their time for the rise that will make their market in due time.

Left to Speculators.

The buying side of the market is left to speculators and they are also busy on the selling side. Of course there is a certain amount of actual liquidation, some margin purchases thrown over-

WHEAT FIRM EARLY, BUT REACTED LATER

War Scare Responsible for the Advance—Corn Also Somewhat Better.

CHICAGO, Oct. 9.—It was a case of war scare in the wheat pit and the shorts tried to cover, running the market up on themselves. The position of the market, other than as based on the possibilities of an European campaign, is not considered favorable to higher prices.

The May delivery advanced nearly a point, or to 104½. Other futures 1½ up. They all weakened on more peaceable outlook.

NEW YORK COTTON PRICES ARE LOWER

NEW YORK, Oct. 9.—The cotton market felt the smothering of steady advance of 2 to 2½ points on heavy rains in the eastern belt, which offset the unfavorable political news from abroad. Trade was of moderate volume, with commission houses generally ranged on the buying side.

WASHINGTON RAILWAY BONDS WERE STRONG AT HIGHER PRICES. STOCKS WERE FIRM.

It was a repetition of the old story in the local stock market. Bonds were prime favorites, even if but five one thousand bonds were sold. The prices were very firm and there was satisfaction to the friends of Washington Railway and Electric Co., to not the rise of ½ of a point on the session today on the 4s of the company named. At the opening they sold at 81½, and after the call at 82½. This is a net gain of 1½ over the prices of a few days ago.
